Website: <http://www.sanusart.com>

Copyright © 2007 Sanus|artificium

Files:

guestbook.php - Main guestbook page.

guestbook.jpg - "Guestbook" image of the main guestbook page.

calcaction.php - Action file.

style.css - Stylesheet file to improve the look and feel of the script.

messages.txt - The file where the data are written.

img_ver.php - The file that displays the "captcha".

img_ver.png - The background of the "captcha" numbers (can be changed to any other picture you like as soon as the name of file stays "img_ver.png").

ok.jpg - Message sent image.

error.jpg - Message error image.

Instructions:

- **IMPORTANT** - PHP 4.x or higher must be installed on the server to run this script.

- **ONLY IF** you have PHP5 installed - you can Uncomment lines 8 and 9 in the "img_ver.php" file for "Gaussian blur" effect of the "captcha".

1. Upload 9 of the mentioned files above to your server.

2. CHMOD the 'messages.txt' file to 666.

3. Access the page by navigating to it with your browser

(<http://www.yourdomain.com/guestbook.php>).

Done!
